

# EARTH DAY

On **April 21, 2023**, a host of activities were conducted in our school to commemorate **Earth Day**. These events served as a platform to sensitize our students about the conservation of natural resources and as a reminder that they need to do their bit to protect our planet and keep it beautiful.

Students discussed the significance of Earth Day in the morning assembly broadcast over the intercom. Several interclass competitions were conducted at different venues on the school campus for classes IV to XII such as Wealth out of Waste, Role Play, making Miniature Gardens, Paper Bag Making Competition, Creative Terrariums, Poster Making on the theme 'Conservation of Biodiversity' There was also an exhibition on Medicinal Plants and their products, Slogan Writing on the theme 'Say No To Single Use Plastic' and collage making competition on the theme 'Save Our Mother Earth'.

Participation in these events made students aware of the urgent need to make environmentally sustainable life choices which will prevent further depletion of the earth's finite natural resources.
