

Educational trip to National Science Center (Science Stream)

27th July 2023

The students of the science stream of classes XI and XII visited the **National Science Centre** on 27th July, 2023. This educational trip was organized to add to classroom teaching and it helped the students gain hands-on-knowledge and experience the many dimensions of science.

Students were able to view the interesting exhibits like working of atoms, nuclear reactions, dinosaur sculptures, working of Konark sundials and Tesla coil model etc. They were able to attend a session on Marine life and enjoy the science shows in which the working of Van-de-graff generator and the application Bernoulli principal was shown.
