

FIRE DRILL

A mock drill on **Fire safety and Awareness** was conducted by the Delhi Fire Service Department on 4th May 2023 in school. The students and teachers were made aware of the causes of fires and were given a hands-on-experience on the use of fire extinguishers during a fire emergency. The session created awareness about fire-fighting techniques and ways to respond swiftly in times of such disasters. Students and teachers also received training on how to be alert and responsible in times of emergencies and how to avoid panic to avert stampede and casualties.

An earthquake drill and preparedness activity was also conducted to apprise the group on how to perform – Drop Cover and Hold-on, a quake safe action designed to protect and save lives. The mock fire and earthquake drill and session was informative, pragmatic and enlightening.
